

4th Stanford Workshop in Formal Demography

May 21 – May 24, 2012

<https://population.stanford.edu/>

The Stanford Centers for Population Research, and the Demography and Economics of Health & Aging, announce a workshop on Formal Demography. Lecturers will present methods and theory from demography, evolutionary ecology, and quantitative genetics. Topics will include Stochastic population forecasts and transfers; Human mortality change; Modeling prehistoric human populations; Stage-age structured models and quantitative trait evolution; Stage-structured models; Stochastic selection.

Applications are invited from advanced students/postdocs/junior faculty for this 3.5-day workshop in Formal Demography. We provide full support for ~12 selected students (no overseas travel). We may also accept students who can pay their own expenses (there is no fee). To apply, please send CV and short statement explaining your interests, no later than March 15, 2012, via EMAIL: nomita@stanford.edu
